How the family bank works

A real bank keeps your money safe and pays you a little extra, called **interest**, for leaving it there. This book lets your child try that idea at home, with you as the bank.

1. Fill in the **Account Opening Form** together.
2. When your child puts money in the bank, write it in the **passbook** as **Money in**. Taking money out goes in **Money out**.
3. Choose a **family bonus** and add it once a month as "Bonus".
4. Colour the **Watch It Grow** chart each month.

Pip is the bank manager!

Choosing a family bonus. Many families use a simple rule like "1 coin for every 10 coins saved, once a month". This is much more than a real bank pays (real savings accounts usually pay a few percent a *year*), but a bigger bonus helps young children see the idea quickly. Explain the difference to older children.

Keep the money safe in a jar or envelope you look after. The passbook is the record; check together that they match.
