Money Detective

The Case of the Missing Coins

A print-and-play money mystery for the whole family

Ages 6–10 · 2 or more players · about 30–45 minutes · 10 printable pages

© 2026 MoneyViel Kids · moneyviel.com · Money Detective Escape Game

FOR GROWN-UPS

FREE SAMPLE

How to set up the game

1. **Print** the pages and cut out the 4 clue cards and the detective badges.
2. **Make a "treasure box":** any box, tin or envelope. Put a small surprise inside (a sticker, a snack, or a few real coins for the SAVE jar). Stick the **Code Lock** card on the front.
3. **Hide the clue cards** around the house. Hide Clue 1 somewhere easy to find, or simply hand it over to start.
4. **Read the Case File** out loud to start the game.
5. Each clue gives **one number**. Four numbers make the secret code. When your detectives tell you the right code, they may open the box!
6. Finish with the **secret message** and the **Case Closed** certificate.

Mr. Hoot is the Chief Detective.

Answers are on the "For grown-ups only" page near the end. Fold it over or keep it aside.

Make it easier for younger children by using real coins for Clue 1. **Make it harder** by adding a timer: can the team crack the case in 20 minutes?

📁 The Case File

Oh no! Duggu has been saving for his sister Chia's birthday present. He put his coins in Pip's **SAVE** jar every day. But this morning, the coins were gone!

Pip found a note: *"Your coins are safe in the treasure box. To open it, solve my 4 money puzzles. Every puzzle hides one number of the secret code. Good luck, detectives! — The Mystery Saver"*

Chief Detective Mr. Hoot needs YOUR help. Find the 4 clue cards, solve each puzzle, and write the numbers in the Code Lock. Then open the box and solve the case!

Cut out a detective badge for every player ✂

🔍 CLUE 1 OF 4

Money Detective Agency

Coins under the sofa

Pip found these coins under the sofa. **How much are these coins worth altogether?** Add up the numbers on them!

Code number 1: ☐ Write the total.

🔍 CLUE 2 OF 4

Money Detective Agency

The pencil shop

Chia buys a pencil for **4 coins** and an eraser for **2 coins**. She pays with **10 coins**.

How much change does she get back?

Tip: first add up what she buys.

Code number 2: ☐ Write the change.
